PROFESSIONAL PROFILE

Performance Marketing & Acquisition Architect

For over 6 years I've specialized in Paid Acquisition (Google Ads, Meta Ads, TikTok Ads), Conversion Rate Optimization (CRO), and advanced analytics (GA4, Server-Side GTM). At Bproduction Agency, Click Brains, and in my independent advisory practice, I don't just manage ad spend: I diagnose why campaigns break, why lead quality collapses while lead volume climbs, and where budget leaks due to tracking failures.

My methodology is rooted in rigorous diagnostic audits. Before adjusting bids or campaign structures, I conduct in-depth historical data analyses (CPM, CTR, CPC, CPA, ROAS). By deploying Server-Side tracking to eliminate browser signal loss (ITP, ad blockers) and feeding algorithmic bidding engines with verified business value (CRM offline conversions, qualified leads, closed sales), I ensure platforms bid for revenue rather than cheap, low-intent traffic.

Open to live account audits, practical hiring tests, and diagnostic dashboard evaluations.

CORE COMPETENCIES & EXPERTISE

- **Paid Acquisition & Performance Marketing:** Google Ads (Search, Shopping, Performance Max, YouTube), Meta Ads (Advantage+, CAPI), TikTok Ads, lead generation, e-commerce scaling, marketplace & app growth, Target CPA / Target ROAS bid optimization, negative keyword architecture, and structured exclusions.
- **Google Ads & E-Commerce Focus:** Google Merchant Center feed optimization, search intent mapping, brand/non-brand segmentation, Target CPA/ROAS bidding, Value-Based Bidding, custom Google Ads Scripts to filter underperforming inventory.
- **Conversion Rate Optimization & Growth:** CRO, A/B testing, landing page and checkout funnel optimization, heuristic audits, user behavior analysis (Hotjar, GA4), eliminating friction throughout the customer buying journey.
- **Analytics, Tracking & Data-Driven Reporting:** GA4, Google Tag Manager, Server-Side GTM (sGTM), Meta CAPI, Google Consent Mode v2, Enhanced Conversions, CRM offline conversion imports, Looker Studio executive dashboards, BigQuery, CPA / ROAS / POAS / LTV / CAC metrics.
- **CRM & Marketing Automation:** HubSpot, Salesforce, lead scoring, CRM-driven feedback loops, customer acquisition funnel efficiency analysis.
- **Technical & Creative Tools:** Python, SQL, Google Ads Scripts, HTML/CSS/JavaScript fundamentals, WordPress, WooCommerce, Canva, AI-assisted creative production.
- **Industry Experience:** DTC E-Commerce (retail, baby & mama, fashion, beauty), B2B lead generation, SaaS & subscription models, education, real estate, and local home services.

PROFESSIONAL EXPERIENCE

Independent Consultant Aug 2025 – Present

PERFORMANCE MARKETING & GROWTH

- 10x Lead Volume & Complete Tracking Overhaul (B2C Lead Gen): Took over an account spending ~$11,000/mo (4M HUF) with zero conversion tracking. Rebuilt the data and measurement infrastructure from scratch, realigned ad creatives with customer search intent, and executed SEO optimizations, scaling inbound lead volume 10x with 100% verified tracking coverage.
- Scaling ROAS from 6 to 10 via Server-Side Tracking (E-Commerce): Scaled a stagnant DTC baby & mama webshop in Shoprenter: deployed Server-Side GTM to stop client-side signal loss, overhauled product feed titles and custom labels, and ran dynamic creative rotation across Meta, TikTok, and PMax.
- +2% Checkout Conversion Rate Lift (CRO): Analyzed user friction across a complex 10-step checkout flow for a beauty supply brand using GA4 and Hotjar. Delivered streamlined wireframes to developers, injected trust and reassurance elements, and integrated user-demanded shipping options, directly increasing checkout completion by +2%.
- Performance Max Automation & Script Engineering (SaaS): Designed full-funnel acquisition strategy and GTM measurement for an online math tutoring subscription platform. Engineered custom Google Ads Scripts to automatically flag and exclude 'zombie' (budget-draining, non-converting) assets in Performance Max campaigns.
- Closed-Loop Lead Quality Optimization (CRM Integration): Restructured acquisition funnels where high lead volume masked poor lead quality. Reconnected CRM offline conversion milestones (HubSpot, Salesforce) into Google and Meta bidding algorithms, shifting machine learning toward closed deal revenue rather than raw form fills.

Click Brains 2024 – 2025

PPC MANAGER

- Managed high-budget, multi-channel PPC portfolios with zero tolerance for wasted spend: conducted recurring structural and search term audits to eliminate non-converting clicks.
- Executed root-cause analysis on ROAS drops and conversion volatility: isolated variables (creative fatigue, audience saturation, technical tracking bugs, checkout friction) instead of blindly raising bids.
- Upgraded incoming lead quality via offline conversion imports and precise negative keyword/audience exclusion rules.
- Translated complex multi-channel performance data into C-level Looker Studio dashboards, illustrating direct relationships between ad spend, CAC, LTV, and net profit margins.
- Dynamically reallocated budgets across Google Ads, Meta, and TikTok based on true incremental CPA and contribution margin.

Bproduction Agency 2020 – 2024

ONLINE MARKETING SPECIALIST

- Architected cross-channel acquisition structures based on high buyer intent and negative keyword defenses, preventing algorithms from draining budget on irrelevant traffic.
- Identified tracking anomalies and data discrepancies: deployed client-side and server-side GTM solutions to restore accurate multi-touch attribution.
- Developed executive Looker Studio dashboards, giving company leadership full visibility into real spend-to-revenue relationships without agency black-box reporting or vanity metrics.
- Executed systematic A/B testing on landing pages to eliminate behavioral friction (headlines, CTAs, form simplification, offer positioning).
- Optimized Google Merchant Center product feeds: restructured feed data, enhanced product attributes, and structured profit-focused Shopping campaigns.

PROOF OF PERFORMANCE

- **$500,000+** Managed Ad Spend with strict profit-oriented governance: pre-scale audits, negative keyword defense, and continuous creative fatigue rotation.

- **100+** Successfully Scaled Campaigns across DTC e-commerce, B2B lead generation, and SaaS verticals.
- **100+** Audited and Delivered Projects: tracking rebuilds, funnel optimizations, custom BI dashboards, and comprehensive account audits.
- Proven Business Wins: 10x lead volume surge, ROAS scaled from 6 to 10, +2% checkout conversion lift, and custom automated PMax script architectures.
- Verifiable Track Record: Transparent case studies, methodologies, and interactive calculators available live at maurerlajos.com.

EDUCATION & CREDENTIALS

- Google Ads & Analytics Certifications: Google Ads Search, Shopping, Measurement (GA4), and Display credentials.
- CXL Institute Credentials: Conversion Rate Optimization (CRO), A/B Testing Masterclass, Conversion Research & UX Research.
- University of Szeged (2016): Business Information Systems (Foundations in data analysis, database management, and information systems).

LET'S CONNECT & ACCOUNT AUDIT

A CV shows what a candidate claims to have achieved. An interview demonstrates how well they articulate it. A practical account audit or technical test proves how they actually diagnose and solve problems in reality. Skip the guesswork: send me a historical metric snapshot, a sample dashboard with an intentional discrepancy, or an account facing a ROAS plateau. I'll isolate the bottlenecks and explain in plain business language what I would modify first, and why.

Email me today at maurerlajos1@gmail.com or call +36 30 268 5650 to schedule an interview.
